PROFILE

Results-oriented software developer with a strong background in full-stack development and experience in Agile environments seeking a position with Edge360. Proficient in JavaScript, Node.js, React, and Ruby on Rails. Committed to delivering high-quality code and building scalable applications using over five years of experience and knowledge.

GEORGE MOORE

PROFESSIONAL EXPERIENCE

October 2020 – Present
Mid-Level Software Developer, Latitude, Inc. • Remote

- Collaborate with senior developers to design and develop web-based applications using HTML, CSS, JavaScript, and AngularJS, resulting in the completion of three major projects within 12 months
- Migrate large-scale software systems to a new cloud-based infrastructure, improving system uptime and creating a more scalable solution for future growth
- Participate in daily code reviews, providing feedback and suggestions to improve overall code quality and maintainability, resulting in a 25% reduction in code defects quarterly

June 2017 – October 2020
Junior Level Software Developer • BeaconFire Solution, Princeton, NJ

- Reduced manual testing time by 35% by designing and implementing automated testing scripts using Selenium and JUnit
- Worked on database design, including data modeling and schema design, for multiple projects using MySQL and MongoDB
- Assisted with troubleshooting and debugging issues in the software development life cycle to ensure the timely delivery of high-quality code
