KEY SKILLS

- Advanced proficiency in CAD software
- Design and analysis
- Knowledge in material science and manufacturing process
- Proficient understanding of mechanical systems
- Project management skills

PROFESSIONAL EXPERIENCE

Lead Mechanical Engineer | Kia Motors America, Irvine, CA
August 2020 - present

- Manage large-scale electric vehicle projects from conception through final product launch, consistently meeting project milestones and budget restrictions
- Spearheaded the development of sustainable material technology and enhanced the company's manufacturing process which resulted in a 10% increase in production efficiency
- Direct a team of 15 mechanical engineers; monitoring their professional growth and ensuring high-quality outputs that meet Tesla's stringent standards

Senior Mechanical Engineer | California Energy Corp., Los Angeles, CA
June 2018 - August 2020

- Led and executed multiple projects in the development of advanced aerospace systems, staying within specified deadlines and budgets
- Supervised and mentored a team of junior engineers, ensuring quality control and compliance with company standards
- Utilized CAD software to design complex mechanical systems, perform simulations, validate designs through testing, and incorporate industry trends into innovative engineering solutions
