 LinkedIn | Portfolio

 Miami, FL

## KEY SKILLS

- Blockchain development (Ethereum, Hyperledger)
- Smart contracts (Solidity, Rust)
- Cryptography and security protocols
- DeFi applications
- Distributed Ledger Technology (DLT)

## PROFESSIONAL EXPERIENCE

Blockchain Software Engineer | Coinbase, Miami, FL | July 2019 – Present

- Developed and deployed Ethereum-based smart contracts, reducing transaction costs by 30%
- Built a decentralized identity verification system, increasing security for over 1 million users
- Enhance blockchain scalability by optimizing consensus algorithms

Software Engineer | Ripple, San Francisco, CA | June 2017 – June 2020

- Designed blockchain payment protocols, reducing cross-border transaction times by 50%
- Integrated cryptographic security measures, preventing data breaches
- Developed APIs for seamless blockchain integration with financial institutions

## EDUCATION

Bachelor of Science (B.S.) Computer Science

Florida International University, Miami, FL | May 2017

## CERTIFICATIONS

- Certified Blockchain Developer, Blockchain Council, October 2021
