

Olivia Harris

Results-driven AI software engineer with six years of experience developing AI models for automation, predictive analytics, and language processing. Passionate about optimizing ML solutions.

-  LinkedIn | Portfolio
-  San Jose, CA

EDUCATION

Master of Science (M.S.) Artificial Intelligence, Stanford University
Stanford, CA | May 2018

KEY SKILLS

- Deep learning and neural networks
- NLP
- Python, TensorFlow, PyTorch
- AI model deployment and optimization
- Computer vision and image recognition

PROFESSIONAL EXPERIENCE

AI SOFTWARE ENGINEER | TESLA, PALO ALTO, CA
JUNE 2020 – PRESENT

- Developed AI-driven autopilot algorithms, increasing vehicle safety by 35%
- Implemented deep learning models for image recognition, improving accuracy by 40%
- Optimized neural networks for real-time processing, reducing inference time by 50%

MACHINE LEARNING ENGINEER | META, MENLO PARK, CA
AUGUST 2018 – MAY 2020

- Built recommendation engines, increasing user engagement by 25%
- Designed NLP models for chatbots, improving customer interaction rates
- Created AI pipelines to automate data analysis, reducing processing times by 30%

CERTIFICATIONS

- Deep Learning Specialization, Coursera (Andrew Ng), September 2020
