LinkedIn I Portfolio

Seattle, WA

KEY SKILLS

- AWS VPC and subnet configuration
- Cloud-based network security
- Load balancing and auto-scaling
- Automation using Terraform and CloudFormation
- Hybrid cloud integration

PROFESSIONAL EXPERIENCE

May 2019 - Present

AWS Network Engineer | CloudEra Solutions | Seattle, WA

- Designed and implemented secure VPCs, reducing cross-region latency by 25% while improving overall system reliability
- Automated deployment pipelines using Terraform, cutting deployment time by 40%
- Integrate AWS Direct Connect with on-premise data centers, enabling seamless hybrid cloud functionality for enterprise clients
- Monitor and optimize AWS network performance, achieving cost savings of $200,000 annually

September 2017 - April 2019

Cloud Network Specialist | NextGen Tech Solutions | Seattle, WA

- Set up and maintained cloud-based firewalls, ensuring 100% compliance with data protection standards
- Assisted in transitioning 10+ clients from legacy systems to AWS cloud environments, improving performance by 30%
- Conducted team training sessions on best practices for cloud-based networking

EDUCATION

Bachelor of Science, Cloud Computing

University of Washington, Seattle |
