👤 Austin, TX

EDUCATION

- Bachelor of Science Information Technology

  University of Texas, Austin

KEY SKILLS

- Advanced Cisco network configuration
- Firewall and security protocol implementation
- Network infrastructure optimization
- Multi-site network management
- Performance monitoring and troubleshooting

John Carter

Proficient in optimizing network infrastructure to enhance speed and reliability. Adept at configuring Cisco routers, switches, and firewalls, resolving technical issues, and implementing advanced security protocols to achieve a 40% reduction in network downtime. Skilled in team leadership and cross-functional collaboration.

PROFESSIONAL EXPERIENCE

Senior Network Engineer I June 2018 - Present
Cloud Networks I Austin, TX

- Designed, implemented, and maintained LAN/WAN infrastructure for 50+ enterprise clients, improving network reliability by 30%
- Developed and deployed security measures, including firewalls and intrusion detection systems (IDS), reducing incidents by 40%
- Led a team of five engineers in upgrading legacy networks, achieving a 25% improvement in data transfer speeds and minimizing downtime during transitions
- Created automated monitoring systems to track network performance and proactively resolve potential issues, saving 20+ hours monthly in troubleshooting

Network Administrator
SecureTech Solutions I Austin, TX

- Monitored and managed over 200 networking devices, including routers, switches, and servers, ensuring 99.9% uptime across multiple sites
- Spearheaded a bandwidth optimization project, resulting in a 35% improvement in application response times and reduced latency
- Conducted regular vulnerability assessments and implemented updates to maintain compliance with security standards
- Trained 10 junior team members on advanced networking concepts, improving overall department efficiency
