KEY SKILLS

- CI/CD pipelines (Jenkins, GitHub Actions)
- Kubernetes and docker
- IaC (Terraform, Ansible)
- Cloud services (AWS, GCP, Azure)
- System monitoring and performance optimization

PROFESSIONAL EXPERIENCE

June 2020 - Present
DevOps Engineer, Microsoft | Redmond, WA

- Automated deployment pipelines, reducing software release times by 40%
- Implement Kubernetes clusters, improving container orchestration efficiency
- Developed monitoring tools, reducing system downtime by 30%

July 2018 - May 2020
Site Reliability Engineer (SRE), IBM | Austin, TX

- Optimized cloud infrastructure, cutting operational costs by 20%
- Improved system resilience by implementing disaster recovery strategies
- Built CI/CD workflows, enhancing developer productivity

EDUCATION

Bachelor of Science (B.S.), Information Technology
University of Texas at Austin, Austin, TX | May 2021

CERTIFICATIONS

- Certified Kubernetes Administrator (CKA), Linux Foundation, December 2020
