KEY SKILLS

- PCR and qPCR techniques
- DNA and RNA sequencing
- Cell culture and microscopy
- Bioinformatics tools
- Data interpretation

Anna Taylor

Molecular biologist specializing in genetic analysis and research techniques
Experienced molecular biologist with six years of experience and a strong foundation in DNA sequencing, PCR, and cell culture. Passionate about advancing research in genetic expression and cellular mechanisms.

PROFESSIONAL EXPERIENCE

RESEARCH SCIENTIST (MOLECULAR BIOLOGY)

BIOTECH SOLUTIONS, LOS ANGELES, CA | JANUARY 2020 – PRESENT

- Conduct PCR analysis and gene expression profiling to enhance drug development processes
- Improved workflow efficiency by 30% through protocol optimization

MOLECULAR BIOLOGY LAB TECHNICIAN

STATE UNIVERSITY, LOS ANGELES, CA | AUGUST 2018 – DECEMBER 2019

- Performed DNA extractions and prepared samples for sequencing experiments
- Assisted in creating presentations for research conferences attended by over 200 professionals

EDUCATION

Master of Science (M.S.) in Molecular Biology

State University, Los Angeles, CA | May 2018
