

Aaron Singh

ABOUT ME

Innovative web developer skilled in coding, testing, troubleshooting, and performance monitoring with hands-on experience from internships at industry-leading technology companies such as Google and IBM. Focused on driving projects using HTML/CSS, JavaScript, and server-side CSS.

PROFESSIONAL EXPERIENCE

Assistant Web Developer | June 2023 - Present

Google, Mountain View, CA

- Conduct performance monitoring to analyze metrics including speed, traffic, and functionality – recommending bug fixes to associate web developers resulting in 18% fewer bugs
- Designed and implemented systems to drive performance metrics and potential improvement, realizing results within three months that increased company revenue by 7% that quarter
- Engineered code for three new Google applications within two months, along with heading up a successful rollout with a user adoption rate of more than 20,000 downloads within the first week for each app
- Support a team of 25 associate and senior web developer

Intern | May 2021 - May 2022

Microsoft, Redmond, WA

- Coordinated with a web and application development team of 20 to develop coding for four new applications that rolled out within six months
- Tested existing code for 25 applications under the supervision of a senior computer programmer
- Formatted graphics for web use, increasing user adoption by 30,000 more downloads within one month
